Dive and Marine Contractors

GUARANTEED **SAFETY, RELIABILITY & PROFESSIONALISM**

Dive and Marine Contractors are a leading provider of services for all types of marine infrastructure, under or in the vicinity of water. Since we were established we have rapidly expanded our client base and gained experience across diverse areas of the industry, successfully delivering projects both as the main contractor and through joint ventures with other providers and clients.

Dive and Marine Contractors' aim is to provide a service whereby safety, reliability and professionalism remain core principles. Our staff are one of our key assets. They are all safety-conscious, highly trained in their chosen sectors and have extensive experience across a broad range of marine-related fields. Our in-depth knowledge of commercial diving,

marine engineering and structural inspections means that we can offer a range of services to suit unique client requirements.

Dive and Marine Contractors provide innovative and versatile solutions to underwater or surface operations with an emphasis on providing the highest standards of service, safety and quality. Our commitment to safety is such that we have implemented an independently accredited Safety Management System to which all our staff adhere. In addition, all work is carried out in accordance with the Safety, Health and Welfare at Work [Construction] Regulations 2013, S.I. of 2013, Safety in Industry [Diving Operations] Regulations 1981 S.I. 422 of 1981, HSE Diving at Work Regulations 1997, Dive and Marine Contractors Safety Manual and ACOP L104 based on the ADC Safety Management System – The Approved Code of Practice for Commercial Diving Projects.

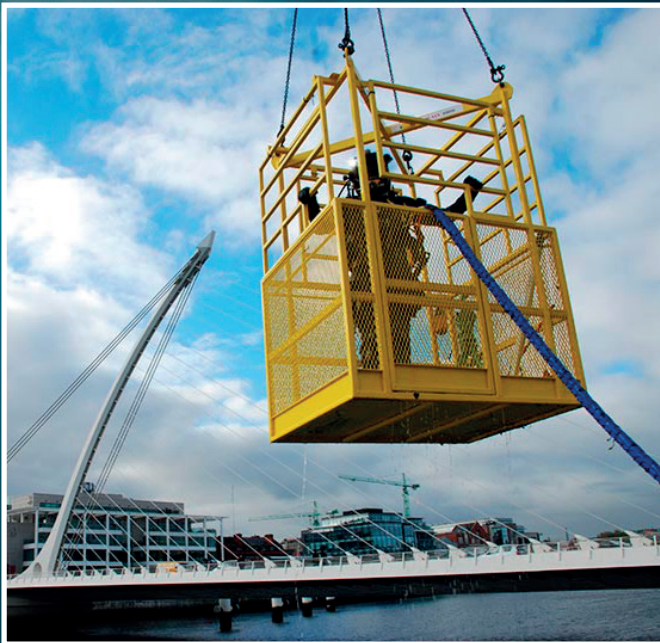

The marine industry is one where safety and trust are of paramount importance. Our client-focused approach means that we consistently strive to exceed expectations and to always supply a safe environmental service, on schedule and within budget.

Commercial Diving

Dive and Marine Contractors are leading specialists in the commercial diving industry with a portfolio of work covering Ireland and the UK. Our dive teams are experienced with a broad range of diving operations and are highly skilled, motivated, and safety conscious. Our team of experienced engineers and divers are available to respond to urgent call outs and can mobilise specialist equipment on short notice. We also operate an extensive range of diving equipment and underwater tools – from a decompression chamber to lightweight air-freight dive systems – which are readily available to tackle the most challenging of projects.

Our Commercial Diving services include:

- Civil Engineering
- Repairs and Maintenance
- Surveys and Inspections
- Archaeological Services
- Salvage and Recovery

Civil Engineering

Operating both as the main contractor and as a subcontractor, Dive and Marine Contractors have built up a comprehensive portfolio of civil engineering projects. We can carry out a diverse range of marine construction activities and can provide qualified engineering staff for both design and construction stages.

Our Civil Engineering services include:

- Design and installation of shuttering for concrete repairs
- Pile repairs – specialist in Fabric Formwork repairs
- Dam beam installation
- Cathodic protection system installation
- Mooring chain replacement
- Underwater welding and burning
- Sluice gate installation
- Scour protection – concrete mattress installation

- Quay wall repairs
- Pipeline installation and decommissioning
- Windfarms
- Outfalls and intakes installation and decommissioning
- Fender removal / installation
- Dredging works
- Ultra high pressure jet washing and hydro demolition

Repairs and Maintenance

Dive and Marine Contractors specialise in finding quick and efficient solutions to our clients' problems. Our repair and maintenance division is noted for fast response times, operating on-call, 24 hours a day. Even in the most challenging situations,

Dive and Marine Contractors carry out repair and maintenance works in a safe, efficient and cost-effective manner.

Our Repair and Maintenance services include:

- Lock gates
- Water intake screens
- Sluice gate maintenance
- Marina maintenance
- Welding and burning of various structures
- Treatment plant pipe work
- Windfarms
- Ship hull cleaning and repairs
- Swimming pools
- Marine growth cleaning
- Culverts
- Anodes
- Piers
- Jetties

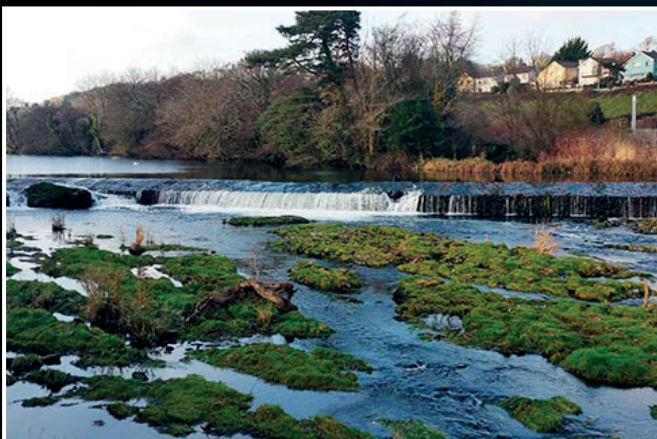

Surveys and Inspections

Dive and Marine Contractors have an experienced team of in-house engineers who deliver accurate surveys both above and below water level. We survey freshwater and marine environments using the most up-to-date and efficient inspection techniques available.

Our Survey and Inspection work includes:

- Non – destructive testing inspections
- Dynamic probing
- Shell and auger core sampling
- Ground investigation
- Bridge structural, scour and undermining inspections
- Marina surveys
- Pier inspections
- Windfarms
- Periodic structural inspections determined by the client's needs
- Ship hull inspections
- Live CCTV footage of the job
- High quality video and stills photography
- Detailed post survey reports
- ROV underwater surveys and inspections on all types of marine structures
- Ultrasonic Thickness & Cathodic Protection Metering

Archaeological Services

Dive and Marine Contractors carry out underwater archaeological services in both freshwater and marine environments. We combine in-house expertise with selected partners to always provide the best solution for our client's needs.

Our Archaeological services include:

- Archaeological surveys
- Underwater video and photography
- Post survey reports
- Dive support
- Underwater excavations

Salvage and Recovery

Dive and Marine Contractors provide a comprehensive salvage and recovery service that is both cost effective and environmentally sensitive. We stock a large range of salvage and recovery equipment to cater for both large and small scale projects. We are accustomed to managing fast-moving and developing situations, while providing top quality service and safety management.

Our Salvage and Recovery services include:

- Wreck inspection, damage assessment and removal
- Dismantling and removal
- Search and recovery
- Towing service
- Custom designed containment curtain, fabrication and installation
- Wreck, debris and seabed clearance
- Underwater construction
- Topside and underwater welding
- Topside and underwater cutting
- Underwater rigging
- Propeller removal and installation

Plant Hire

In addition to providing a commercial diving service, Dive and Marine Contractors have a wide range of plant and machinery available for hire. All our plant and machinery operators are experienced and hold all relevant CSCS certificates, and all our boat and barge operations are undertaken by qualified and experienced coxswains. We maintain up-to-date maintenance records for all our plant, and all plant and equipment is continually maintained throughout our PMS system.

Our Plant Hire services include:

- Waterking pontoon barge with hydraulically operated spud legs
- Twin jet 540hp propelled boat for use as a work boat or for barge manoeuvring operations
- Various RHIB's for diving, survey work or safety boat hire
- 8-ton crawler crane
- Welding and cutting plant – above and underwater
- Hydraulic power packs with various hydraulic tools
- Compressors with various pneumatic tools
- Godiva High Volume Fire Pump
- Hydraulic Trash Pumps
- Decompression chamber

ENVIRONMENTAL

Dive and Marine are actively involved in invasive species control both above and below water. Our sister company **Envirico** can tackle any invasive infestation in both land or aquatic habitats, for example zebra mussels, aquatic weeds and Japanese knotweed. Our services include, but are not limited to:

- Site Survey and Mapping
- Drafting Site-specific Management Plans
- Production of Tendering Documents
- Site Supervision
- Post-treatment Monitoring
- Project Management
- Site Excavation and Management
- Implementation of Control Measures
- Ecological Impact Statements
- Biodiversity surveys
